# Web Part Installation Instructions for SharePoint 2019 and SharePoint Subscription Edition "Modern" Pages

- Download the web part ("SP2019" version) zip file from the product page on our website at **http://www.amrein.com**
- Deploy the farm solution as described in the instructions found on the product page.
- Extract the **aewebpart.sppkg** file contained in the downloaded zip file
- Upload the file to the Sharepoint App Catalog at "/sites/AppCatalog" ("Apps for SharePoint"). Please note that this step needs to be performed only once since all web parts share the same App.
- You now can insert the "**AE Webpart**" web part onto a "modern" page:

- proceed to configure the web part:

Title:
enter the optional web part title

Web Part:
enter the web part name.

Examples:
AEWeather
AEBlogRollup
AEGoogleMap

Configuration:
enter one or more web part configuration parameters (place each onto a separate line)
The available parameters on the corresponding product web page at
http://www.amrein.com/apps/toc.asp?Q=SP2019SPFx.

Height:
enter the optional web part height in pixels

License Key:
enter your Product License Key.
Leave this field empty if you are using the free 30 day evaluation version.
