## Description

The Color Calendar displays the color-code appointments of a Sharepoint Calendar. The web part size can be freely configured so it can be used as a "mini" calendar.

The Web Part can be used with Windows Sharepoint Services V3, MOSS 2007 and Sharepoint 2010.

The following parameters can be configured:

- The Sharepoint Calendar to be displayed
- The web part size and colors
- The amount of detail information to be displayed

## Prerequisites

Before you attempt to install the solutions you need to make sure that you have the following installed on your server(s):

- Microsoft Office SharePoint Server 2007, WSS 3.0 or Sharepoint 2010

## Installation

### Manual Installation

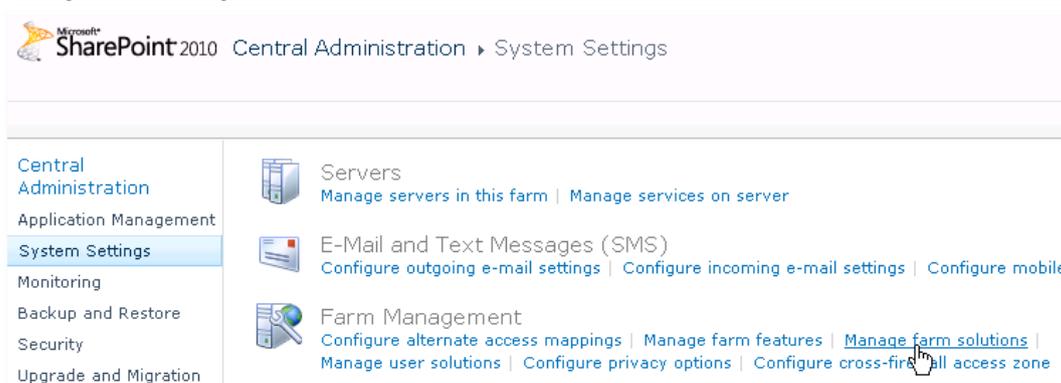

1. download and unpack the **AIColorCalendarWebpart.zip** file.  
The ZIP archive contains the AIColorCalendarWebpart.dll and the AIColorCalendar.webpart files.
2. drop the AIColorCalendarWebpart.dll into the GAC of your Sharepoint server (c:\windows\assembly).
3. add the following line to the "<SafeControls>" section of your Web.Config file.  
Please make sure that the line is added as one single line (no line breaks):

```
<SafeControl Assembly="AIColorCalendarWebpart, Version=1.0.0.0, Culture=neutral,
PublicKeyToken=d0196ea0f653287c" Namespace="AIColorCalendarWebpart" TypeName="*" Safe="True" />
```

4. from the top site go to "Site Actions/Site Settings/Modify All Site Settings/Galleries/Web Parts"
5. use the "Upload" menu option to upload the AIColorCalendar.webpart file.

### Automatic Installation

1. Unpack the **AIColorCalendarWebpart.wsp** and **Install.bat** (**install2010.bat** for Sharepoint 2010) files from the Zip Archive and place the 2 files onto your Sharepoint Server.
2. Add the Solution by either running **Install.bat** or manually entering:  
`stsadm -o addsolution -filename AIColorCalendarWebpart.wsp`
3. Deploy the solution by navigating with your browser to "Central Administration > System Settings > Farm Management > Manage farm solutions"

4. You should now see the **AIColorCalendarWebpart.wsp** in the farm's solution store:

Microsoft SharePoint 2010 Central Administration > Solution Management  
This page has a list of the Solutions in the farm.

	Name	Status	Deployed To
Central Administration	<a href="#">aegooglemapwebpart.wsp</a>	Deployed	None
Application Management	<a href="#">aecolorcalendarwebpart.wsp</a>	Not Deployed	http://bto-web1-cd/
System Settings	<a href="#">aegooglemapwebpart.wsp</a>	Deployed	http://bto-web1-cd/
Monitoring			

Click on "AECOLORCalendarWebpart.wsp" to deploy the solution:

Microsoft SharePoint 2010 Central Administration > Solution Properties

	Deploy Solution	Remove Solution	Back to Solutions
Central Administration	<a href="#">Deploy Solution</a>	<a href="#">Remove Solution</a>	<a href="#">Back to Solutions</a>
Application Management			
System Settings			
Monitoring			
Backup and Restore			
Security			
Upgrade and Migration			
General Application Settings			
Name:	aecolorcalendarwebpart.wsp		
Type:	Core Solution		
Contains Web Application Resource:	Yes		
Contains Global Assembly:	Yes		
Contains Code Access Security Policy:	No		
Deployment Server Type:	Front-end Web server		
Deployment Status:	Not Deployed		
Deployed To:	None		

5. Proceed to activate the feature by navigating to the "Site Actions/Site Settings" page in your top-level site:

Test2010 > Site Settings

Home	Users and Permissions	Look and Feel
<ul style="list-style-type: none"> <li>Pictures</li> <li>Test Pictures</li> <li>Documents</li> <li>Site Pages</li> <li>Shared Documents</li> <li>Lists</li> <li>Calendar</li> <li>Tasks</li> <li>Nice Restaurants</li> <li>AdvWorksEmployees</li> <li>Discussions</li> <li>Team Discussion</li> <li>Recycle Bin</li> <li>All Site Content</li> </ul>	<ul style="list-style-type: none"> <li>People and groups</li> <li>Site permissions</li> <li>Site collection administrators</li> <li>All people</li> <li>Galleries</li> <li>Site columns</li> <li>Site content types</li> <li>Web parts</li> <li>List templates</li> <li>Master pages</li> <li>Themes</li> <li>Solutions</li> <li>Site Administration</li> <li>Regional settings</li> <li>Site libraries and lists</li> <li>User alerts</li> <li>RSS</li> <li>Search and offline availability</li> <li>Sites and workspaces</li> <li>Workflows</li> <li>Workflow settings</li> <li>Related Links scope settings</li> <li>Term store management</li> </ul>	<ul style="list-style-type: none"> <li>Title, description, and icon</li> <li>Quick launch</li> <li>Top link bar</li> <li>Tree view</li> <li>Site theme</li> <li>Site Actions</li> <li>Manage site features</li> <li>Save site as template</li> <li>Reset to site definition</li> <li>Delete this site</li> <li>Site Web Analytics reports</li> <li>Site Collection Web Analytics reports</li> <li>Site Collection Administration</li> <li>Search settings</li> <li>Search scopes</li> <li>Search keywords</li> <li>FAST Search keywords</li> <li>FAST Search site promotion and demotion</li> <li>FAST Search user context</li> <li>Recycle bin</li> <li>Site collection features</li> <li>Site hierarchy</li> </ul>

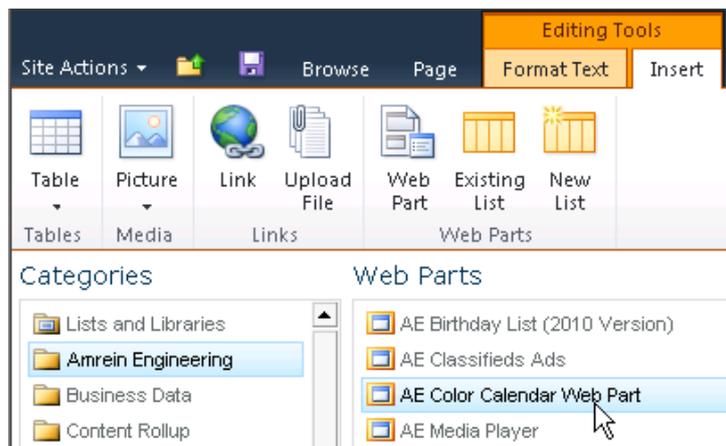

6. Choose "Site collection features" to navigate to the Site Collection Features page:

Activate the "AE ColorCalendar Web Part" feature

## Adding the Web Part to a Page

Navigate to a page where you would like to place the web part and choose "Site Actions/Edit Page"  
Add the web part to the appropriate zone. The web part is listed in the "Amrein Engineering" gallery section:

---

## License Activation

You have the following 3 options to enter your License Key:

1. Enter the License Key into the corresponding “**License Key**” field in the web part configuration pane (see Description above).
2. **WSP Solution Deployment:**  
Add the **License.txt** file (as supplied by AMREIN ENGINEERING after having purchased a license) to the Solution at the following location:

```
c:\Program Files\Common Files\Microsoft Shared\Web Server  
Extensions\14\template\features\AECColorCalendarWebpart
```

### Manual Deployment:

Add the License Key to your web.config (typically found at c:\inetpub\wwwroot\wss\virtualdirectories\80) **<appSettings>** section as follows:

```
<appSettings>  
  <add key="AECC" value="AECC-x-xxxxx-xxxxx-xx-xx" />  
</appSettings>
```

Replace the “x” characters with your actual key values.

Please note that this method requires you to manually add the key to each Sharepoint application.
