Staff Directory Web Part

Sharepoint 2010 Version

© AMREIN ENGINEERING AG Version 1.0

May 2010

Description

The Staff Directory Web Part reads the user entries from the MOSS User Profile Store and displays the selected user fields in a list.

The Web Part requires Windows Sharepoint Server 2010

The following parameters can be configured:

- Sharepoint Site
- User Properties to be displayed
- Filtering, Grouping, Searching, Paging and Sorting of rows
- AZ Index
- optional Header text
- Online Presence Information

Prerequisites

Before you attempt to install the solutions you need to make sure that you have the following installed on your server(s):

Microsoft SharePoint Server 2010

Installation

Manual Installation

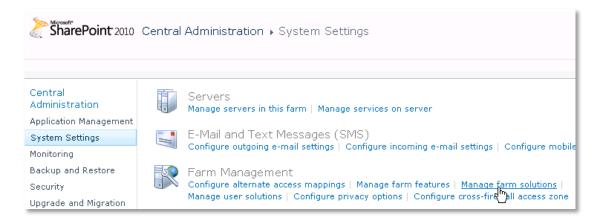

- download and unpack the AEXStaffDirectoryWebpart.zip file.
 The ZIP archive contains the AEXStaffDirectoryWebpart.dll and the AEXStaffDirectory.webpart files.
- 2. drop the AEXStaffDirectoryWebpart.dll into the GAC of your Sharepoint server (c:\windows\assembly).
- 3. add the following line to the "<SafeControls>" section of your Web.Config file. Please make sure that the line is added as one single line (no line breaks):

```
<SafeControl Assembly="AEXStaffDirectoryWebpart, Version=1.0.0.0, Culture=neutral,
PublicKeyToken=0ef1e79d8a7ea7b3" Namespace="AEXStaffDirectoryWebpart" TypeName="*" Safe="True" />
```

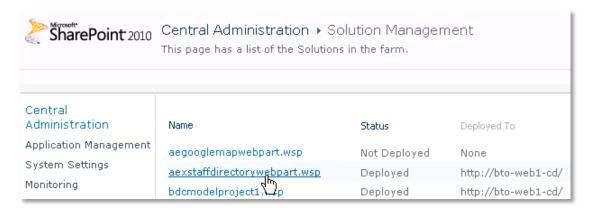

- 4. from the top site go to "Site Actions/Site Settings/Modify All Site Settings/Galleries/Web Parts"
- 5. use the "Upload" menu option to upload the AEXStaffDirectory.webpart file.

Automatic Installation

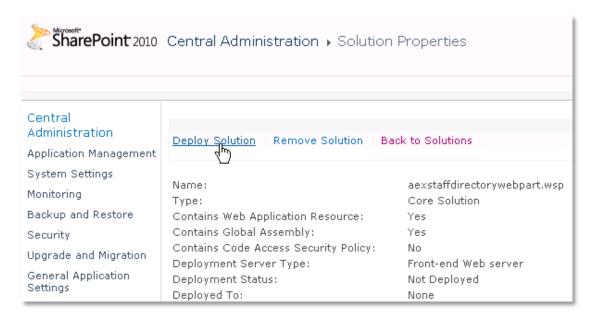

- Unpack the AEXStaffDirectoryWebpart.wsp and Install.bat files from the Zip Archive and place the 2 files onto your Sharepoint Server.
- Add the Solution by either running Install.bat or manually entering: stsadm -o addsolution -filename AEXStaffDirectoryWebpart.wsp
- 3. Deploy the solution by navigating with your browser to "Central Administration > System Settings > Farm Management > Manage farm solutions":

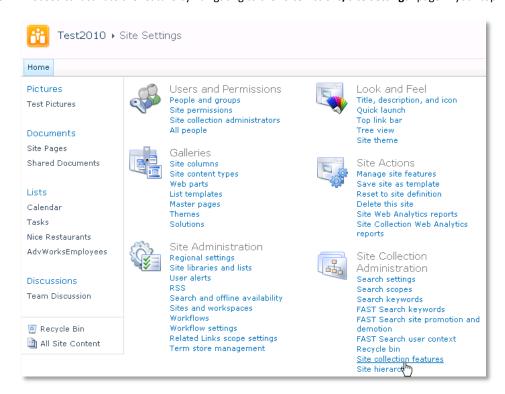

4. You should now see the AEXStaffDirectoryWebpart.wsp in the farm's solution store:

Click on "AEXStaffDirectoryWebpart.wsp" to deploy the solution:

5. Proceed to activate the feature by navigating to the "Site Actions/Site Settings" page in your top-level site:

Choose "Site collection features" to navigate to the Site Collection Features page:

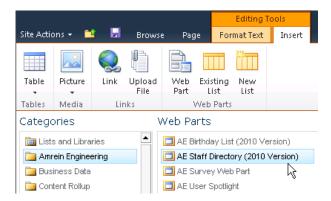

Activate the "AE Staff Directory Web Part" feature

Adding the Web Part to a Page

Navigate to a page where you would like to place the web part and choose "Site Actions/Edit Page"

Add the web part to the appropriate zone. The web part is listed in the "Amrein Engineering" gallery section:

Security Note:

if you get the following error message: "Only an administrator may enumerate through all user profiles", you will neeed to grant the application pool account(s) for the web application(s) "Manage User Profiles" permissions within the SSP. This ensures that the application pool is able to retrieve the list of user profiles.

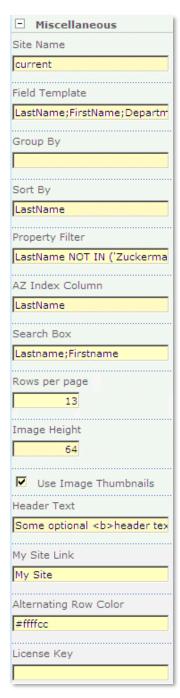

To assign this permission, access your active Shared Services Provider via Central Admin.

From the "User Profiles and My Sites" group, click "Personalization services permissions".

Add the "Manage User Profiles" permission to your application pool account(s).

Web Part Configuration

Configure the following Web Part properties in the Web Part Editor "Miscellaneous" pane section as needed:

Site Name:

Enter the name of the site (Shared Services Provider) that contains the User Profile Store:

- leave this field empty if the User Profile is in the default SSP
- Enter "current" if the User Profile is in the current site
- Enter the Site name to choose a specific SSP
- Field Template: Enter the User properties to be displayed (separated by semicolons). The following properties are available:

 - PreferredName WebSite
 WorkPhone WorkEmail

- - SPS-SkillsSPS-PastProjects

- Office
- Department
- Title
- Manager
- AboutMe
- Presence
- Assistant
- CellPhone
- Fax
- HomePhone
- SPS-Interests
- SPS-School
- SPS-SipAddress
- SPS-Birthday
- SPS-MySiteUpgrade
- SPS-HireDate

Friendly Header Names:

If you would like to display a "friendly header name" instead of the default property name please append it to the User property, separated by the "|" pipe symbol.

LastName | Last Name; FirstName; Department; WorkEmail | Email; WebSite | Website; Personal Space

PersonalSpace

Online Presence Information:

You can optionally add a presence indicator by adding the **Presence** column to the Field Template:

- **Group By**: enter an optional User property to group the rows.
- Sort By: enter the User property to define the default sort order. You can add multiple properties separated by 0 commas.

Examples:

Department

Department,LastName

Property Filter: enter an optional Filter condition to apply a filter. Combine multiple conditions with AND and OR. You can choose from the following filter operators:

Operator	Description
AND	Combines more than one clause. Records must match all criteria to be displayed.
OR	Combines more than one clause. Records must match at least one of the filter expressions
NOT	Reverses an expression. Can be used in conjunction with any other clause.
<. >. <=. and >=	Performs comparison of values. These comparisons can be numeric or alphabetic.
BETWEEN	Specifies an inclusive range. Example: Units BETWEEN 5 AND 15
<> u =	Performs equality testing.
IS NULL	Tests the Property for a null value.
IN(a,b,c)	A short form for using an OR clause with the same field.
LIKE	Performs pattern matching with string data types.
+	Adds two numeric values. or concatenates a string.
-	Subtracts one numeric value from another.
*	Multiplies two numeric values.
/	Divides one numeric value by another.
용	Finds the modulus (the remainder after one number is divided by another).

Examples:

Department='IT'

Department<> 'Sales'

Department IN ('Sales', 'Development', 'IT')

LastName NOT IS NULL AND Department='Sales'

- AZ Index Column: enter an optional User property to display the AZ filter in the list header.
 If an "!" character is appended to the property name, the "A" index will be forced when visiting the page.
 Example: LastName!
- Search Box: enter one or more User properties (separated by semicolons) to allow for interactive searching.
 Example: LastName;FirstName;Department

```
Lastname: Miller Firstname:
```

 Rows per page: the Staff Directory web part supports paging and lets you specify the desired number of rows per page.

- Image Height: specify the image height in pixels if you include the "PictureURL" property.
 Enter "0" if you want to use the default picture size.
- Use Image Thumbnails: use the user image thumbnails as generated by Sharepoints. Uncheck this option if your user profile images have not been uploaded via Sharepoint.
- o Header Text: enter an optional header text. Please note that you can embed HTML tags if needed.
- My Site Link: enter the desired display name of the "Personal Space" link.
- o Alternating Row Color: enter the optional color of the alternating row background (leave blank to use default).
- License Key: enter your Product License Key (as supplied after purchase of the "Staff Directory Web Part" license key).
 Leave this field empty if you are using the free 30 day evaluation version or if you choose one of the License Activation described below.

License Activation

You have the following 3 options to enter your License Key:

1. Enter the License Key into the corresponding "License Key" field in the web part configuration pane (See Description above).

2. WSP Solution Deployment:

Add the **License.txt** file (as supplied by AMREIN ENGINEERING after having purchased a license) to the Solution at the following location:

```
c:\Program Files\Common Files\Microsoft Shared\Web Server
Extensions\12\template\features\AEXStaffDirectoryWebpart
```

3. Manual Deployment:

Add the License Key to your web.config (typically found at c:\inetpub\wwwroot\wss\virtualdirectories\80) <appSettings>section as follows:

```
<appSettings>
<add key="AESD" value="AESD-x-xxxxx-xxxxx-xx" />
</appSettings>
```

Replace the "x" characters with your actual key values.

Please note that this method requires you to manually add the key to each Sharepoint application.
